## Course Details:

This course helps architects to gain the skills required to design an HPE Aruba Networking Campus Access switching solution. An architect is an IT professional proficient in interpreting technical requirements to create and design secure, redundant, scalable, resilient, or high-performing infrastructure consistent with appropriate validated solution guide per business needs. Architects can interpret complex requirements and constraints to design an optimal HPE Aruba Networking solution. The candidate can take HPE Aruba Networking solutions and articulate the business value to multiple stakeholders. The architect needs to have vast technical knowledge across the products and solutions. These solutions may require a migration and/or deployment strategy from/into an existing architecture. They need to understand the design implications of third-party interoperability (hardware/software). Additionally, the candidate will have extensive experience building solutions and optimizing applications and workloads.

## Ideal Candidate for this Course:

We strongly recommended that the candidate has their Campus Access professional level certification (ACP – CA) or equivalent experience prior to taking this course and the associated exam. The ideal candidate for this certification is a senior technical professional. Examples of appropriate experience may include: principal engineer, network consultant, presales consultant, solutions architect, networking SME, network security architect, or technical member from architecture teams.

## Mandatory Requirement:

All attendees **must** have a valid HPE Learner ID to join the course.

## Course Objectives:

After you successfully complete this course, expect to be able to:

- Interpret technical requirements
- Articulate the business value to multiple stakeholders
- Proficient in designing solutions that are secure, redundant, scalable and resilient
- Use your knowledge of the appropriate validated solution guide to meet the customer's business needs

Places on this course are limited and are available to new candidates only. If you have previously taken this course or hold the associated certification you will not be eligible for this training. There is a nominations process in place to ensure a fair allocation of spaces. Registering your interest does not guarantee a place on the course, and your application will need to be approved by Aruba. Please register your interest [here](#).
