data sheet.](#)

Course Details:

This course teaches you the advanced skills necessary to implement and operate enterprise level Aruba Campus Access solutions. You will build on the skills you learned at the Associate level to configure, secure and manage modern, open standards-based wired and wireless network solutions using Aruba's switching, mobility, security and management technologies.

Ideal Candidate for this Course:

The ideal candidates have 2 to 5 years' experience with Aruba portfolio and an understanding of their actions on the network, impact and risk of change management.

Mandatory Requirements:

We have seen many students skipping the Associate level course and certifications and then struggling in this higher-level course. All attendees (who haven't completed the Associate level) must take this short [self-assessment](#) to make sure this course is suitable.

All attendees **must** have a valid HPE Learner ID to join the course.

Course Objectives:

After you successfully complete this course, expect to be able to:

- Build a Wired Infrastructure with Aruba Switches
- Configure Aruba Switches with VSX
- Configure routing using OSPF
- Managing Aruba Switches using Aruba Central
- Deploy Aruba Gateways
- Build Aruba overlay wireless networks
- Configure Enterprise WLAN using Aruba Gateways
- Configure Guest WLAN using Aruba Gateways
- Configure PSK WLAN using Aruba Gateways
- Configure Authentication on the Wired Access Layer

Places on this course are limited and are available to new candidates only. If you have previously taken this course or hold the associated certification you will not be eligible for this training. There is a nominations process in place to ensure a fair allocation of spaces. Registering your interest does not guarantee a place on the course, and your application will need to be approved by Aruba. Please register your interest [here](#).
