

# Network Management with HPE Aruba Networking Central (AOS-10)

## Course description

This 3 day course teaches students how HPE Aruba Networking Central, HPE’s cloud-based network management system, enables IT staff to manage and monitor both wired and wireless environments. This course includes topics such as HPE Aruba Networking Central RESTAPI and teaches students MSP features within HPE GreenLake. Students will learn how to simplify the onboarding and provisioning process for new network devices, such as HPE Aruba Networking access points, switches, and gateways. This course teaches learners how VisualRF integrates with HPE Aruba Networking Central and how to configure traditional Instant APs (AOS-8) and AOS-10 APs with HPE Aruba Networking Central as well as and how to leverage other value-added network services such as guest access, AIOps, contact tracing, and presence analytics. Students will learn several best practices for administration, monitoring, troubleshooting, and reporting services which help them proactively assess and improve network performance. This course includes training and hands-on labs.
